

Instructions for Four Foot Diameter Aviary

1. Stand door panel in upright position.
2. Next, attach a wire panel to the door panel by placing its male hinges into the female hinges on door panel. This will be to the right of door panel if facing door panel from the inside.
3. Working clockwise attach all remaining panels one at a time in the same manner.
4. Attach the #1 roof section to the outside of the top horizontal frame tubing of the door panel by using one of the short screws. Someone will need to be inside the cage on a step ladder to hold the roof tip stable and angled up at approximately 40 degrees or so.
5. Working counter-clockwise, attach panels 2 thru 5 in the same manner. In order for roof to be assembled properly, the corner opposite door panel needs to remain at a 90 degree right angle during the roof assembly process.
6. Hold the small star shaped metal plate under the opening at the pinnacle of the attached roof panels.
7. Place the larger grooved star shaped metal plate above the opening on top of the attached roof panels.
8. Working from inside, place the largest screw in your screw packet through the holes of both the small and large star shaped metal plates.
9. Screw the ornamental sphere onto the protruding screw on the top of the aviary.
10. **Indoor Floor Kit** – Screw in casters into metal threaded sockets located on bottom of legs.
11. Use the supplied carriage bolts and push through the wire mesh. Attach wingnuts on the inside of the cage. Place the star shaped grate through the door opening at an angle and then hold horizontally as you lower it onto the carriage bolts/wingnuts.
12. The debris trays may be placed either on top of the grate; or, they may be placed on the floor directly beneath the grate. They will function either way depending solely on preference.

Note:

Our Powder Coat colors have been coordinated with **Rust-O-Leum Gloss Enamel**. It is available at most any local hardware or home improvement store. It is non toxic, and provides a tough enamel finish for you to use as convenient touch up as needed. Below is the color equivalences listed on the cans of spray paint.

Black Jewel = **Gloss Black**
